DETAILED ACTION

Election/Restrictions

Claims 12 and 15-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/19/04.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 4, 8, 10, and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended claim 1 to include the limitation "non-reactive as incorporated in the polysiloxane".

Application/Control Number: 09/621,788

Art Unit: 1712

There does not appear to be any support for this subject matter in the specification or the claims. Therefore, this is considered to be new matter.

Claim Rejections - 35 USC § 102/103

Claims 1-3, 8, 10, and 11 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Swei (5,182,173). Regarding claims 1-3, Swei disclose a surface coated hard material (Abstract), more specifically aluminum oxide (col.2, lines 30-32), the surface of which has a polysiloxane coating (col.2, line 45-col.5, line 29). Although Swei does not appear to specifically disclose the instantly claimed hardness values, it appears that Swei inherently discloses these values because the materials of Swei are the same as those claimed by Applicant, and the same materials can reasonably be expected to yield products which inherently have the same properties. If not inherently disclosed, then it would have been obvious to one of ordinary skill in the art at the time the invention was made for the surface of Swei to have an at least similar hardness as instantly claimed, because the materials of Swei are at least similar to those as claimed by Applicant, and at least similar materials would have yielded at least similar properties. Although Applicant has argued in the response to the previous office action that the silicone coating of Swei is not the same as Applicant's polysiloxane, this is not clear. A polysiloxane as claimed by Applicant is interchangeably called a silicone, and therefore the coating of Swei appears to be a polysiloxane coating. It is not clear how the silicone of Swei differs from the polysiloxane of Applicant.

Application/Control Number: 09/621,788

Art Unit: 1712

Regarding claim 8, Swei discloses the instantly claimed polysiloxane (col.2, line 45-col.5, line 29).

Regarding claim 10 and 11, Swei discloses an amount of silicone that is included in the instantly claimed ranges (col.5, lines 51-61).

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims, and the pending U.S.C 112, first paragraph rejection, as set forth above, is cleared up. Saam (4,244,849) discloses a hard surface material of calcined alumina, but discloses a much higher amount of the polysiloxane, as it is present in emulsion.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher M. Keehan whose telephone number is (571) 272-1087. The examiner can normally be reached on Monday-Friday, from 6:30 to 3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy P. Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
